DAVID BURCKHARDT

SOFTWARE DEVELOPER

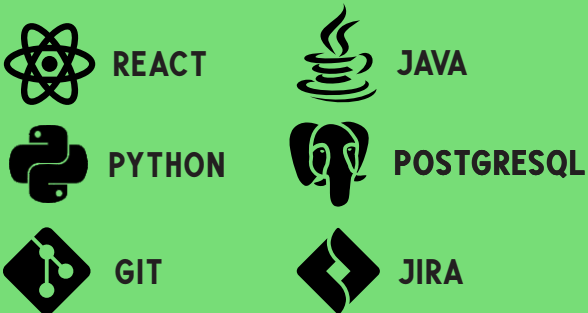

I'm looking for a challenge to help me progress. I want to learn and gain experience for my professional and personal development. I aspire to find a place in a good team with a great desire to work and complement each other.

Systems Engineer

UNICEN, Tandil, Argentina
GPA: 9.16

2024

HARD SKILLS

SOFT SKILLS

LANGUAGES

English

Level: B1
Institute: CEM English

Spanish

Native

Experience

Segmentation Tool 2023 - 2024 Pladema, Tandil, Argentina

I developed an AI model capable of segmenting devices for the treatment of cerebral aneurysms using a pre-existing convolutional neural network developed in Python. Over the course of a year, I specialized in deep learning and neural network operations, completing my internship and finalizing my thesis.

Student Assistant 2023 - 2024 UNICEN, Tandil, Argentina

I acquired communication skills and teaching methods as a teaching assistant in 'Information Theory' and 'Databases I', where I also reinforced my knowledge in PostgreSQL.

Web Developer 2022 NGO Reinventar, Tandil, Argentina

I was a member of the frontend development team for a website intended for an NGO in the city of Tandil. Here, I applied my skills in HTML, CSS, and JavaScript.

Further Education

Backend Developer 2024 Lamansys, Tandil, Argentina

I completed a bootcamp focused on the Spring framework in Java, using Liquibase and PostgreSQL for database management. The organization was based on Jira and Scrum.

React Bootcamp 2023 Midudev, Youtube

I learned React by developing small games and interactive interfaces, using key hooks and managing data in local storage to enhance user experience.

Python Sin Fronteras 2022 Nicolas Schurmann, Udemy

I completed an intensive Python course, where I incorporated and applied my knowledge by developing the backend of a web app using the Flask framework and managing databases with MySQL.

Portfolio

During 2024, I developed my portfolio to include all the projects not detailed in this CV due to length constraints. I implemented it entirely with React.
